Company Profile:

MCM Concrete s.a.r.l. is located in Nahr el Mot, supplying Ready Mix Concrete covering Mount Lebanon & Beirut areas.

MCM Concrete is a sister company of MCM Group, having a long history in building construction and contracting fields in the Middle East and Gulf countries (Lebanon, UAE and KSA).

MCM Concrete is managed in partnership with Engineer Joseph Zbeidy, who has 15 years experience in the ready mix concrete industry.

We are supplying ready mix concrete for MCM Group Lebanon that is undertaking various construction projects in Beirut and North Lebanon (Las Salinas resort).

We are committed to establishing long-term, valuable business relationships by providing its customers with quality materials at competitive prices.

Quality assurance

At MCM Concrete, we understand that our product, concrete, is one of the most unique and versatile building materials in the world. It can assume virtually any shape and reach great strengths. Concrete is perishable in its plastic state and very "sensitive" from the time the raw materials are combined until the final product is delivered. Mixing, transportation, placing, and curing can influence its plastic and hardened properties. This is why MCM Concrete places great emphasis on quality. MCM Concrete is leading the way to higher quality practices with the implementation of a Quality Management System based on the guidelines and principles of ACI 121.

MCM Concrete Environmental Statement

MCM Concrete is committed to operate in an environmentally and socially responsible manner. A sustainable, environment-friendly operation will reward the company with loyal employees and customers and will bring about positive changes in our entire industry.

MCM Concrete Fleet

Our fleet consists of:

- * 2 Batching plants (240 cu.m/hr);
- * 2 Generators (600 KVA each);
- * 140-Ton Scale;
- * 2 Loaders;
- * 4 Pumps (36, 42 and 52 m long);
- * 15 Truck mixers (10 & 12 cu.m);
- * 4 Cement Silos (600 Tons); and
- * A fully equipped laboratory.

At MCM Concrete, both dispatch and quality assurance use the most state-of-the-art equipment and procedures to ensure on-time delivery of the highest quality concrete.
